Join us as Dr. Sandra Davis describes her experiences as a young girl working for U.S. Army Special Forces in Korea and Vietnam. She witnessed the best and worst of human nature. Dr. Davis barely escaped a stalker, survived mortar attacks and met many dignitaries, including the future president of the Philippines. Her favorites were the young, brave, polite and appreciative soldiers. She is proud to pay tribute to them, and for them, she would do it all again! Her presentation is documented in her book, "So, What's a Nice Girl Like You Doing In a Place Like This? Seoul to Saigon."

New! Funerals — All the Questions You Have but are Afraid to Ask

It's hard to talk about death in America. Even though the topic has been taboo, life's end is an eventual reality. So why not shape it to our values? Come and ask your questions and find out your options. What do you wonder about? What goes on behind the scenes? Do you have to be embalmed? What makes up the cost of a funeral or cremation? Are there options available when you choose cremation? Can you bury cremated remains? What is a niche? What about scattering? Why should you pre-plan? Why should you pre-pay? It's tough to ponder any question beginning with the phrase, "If I were to die..." "Remember: Talking about sex won't make you pregnant. Talking about funerals and end-of-life issues won't make you dead."

Old Sacred Heart Hospital Tour

In 1980, the Tower East Group purchased the property which originally opened in 1815. The Ritz family wanted to preserve the hospital for the future. The Daughters of Charity, a religious order dating back to 1633, opened Sacred Heart as the first Catholic hospital in Florida. Trainloads of Alabama sandstone, Indiana limestone, several million bricks, thousands of barrels of concrete and marble were used in the building which was added to the National Register of Historic Places in 1982. In the beginning, a patient paid \$1 per day for a bed in a ward but nobody was turned away who could not afford the cost. Meet Aaron Ritz and enjoy a historical talk and tour of this gem which stands on 12th Avenue. There is plenty of parking in the front, back and along 12th Avenue. We will meet just inside the front door.

Who Cares About Our World Series III

This series continues with an ongoing eye on changing the tenor of race relations in America. Focal points of the discussion will include essential historical and contemporary dynamics central to change effecting strategies. Consideration in past discussions was given to impediments in institutional structures and practices and apparent mounting cultural tensions. In session three, our attention shifts to the “reality of colliding social worlds.” In the juxtaposition of these glimmers for paths forward may appear. Sometimes the proverbial light at the end of the tunnel is, in fact, not the way out, but just enough of a gleam of hope to aspire for a better world.

is unnecessary to look beyond The United States for proof of this contention, but it is illustrative to do so and to uncover the foundation of an extraordinary body of public discourse unique to western societies. Greek antiquity provides the starting point for reasoned argument as practiced historically in America and other nations of The West. The role of debate in governing the operations of The Greek City States and thus the affairs of their citizenry inform the principles of justice and representative government in American public institutions. In this class discover the true meaning of “rhetorical oratory,” note the peril it faces today as practiced by some prominent national figures, consider the elements of genuinely great public speech, and review what makes President Franklin Roosevelt’s 1941 request for A “Declaration of War” a stellar work of public discourse.

New! American Civil War: Peninsula Campaign — 2 Sessions

Peninsula Campaign, a two-part series discussing the Union's first attempt to capture the Confederate capital in Richmond, Va., during the spring and summer of 1862. Part I - Beginning to Seven Pines and Part II - Seven Days Battles and Conclusion. It was the largest campaign of the American civil war. Nearly 250,000 soldiers were involved on land, at sea and in the air. More participants than any other single campaign of the civil war. About one in four of those were killed, captured or missing. There is no estimate on the number of war materials consumed. It was a remarkable logistical achievement to transfer men, horses, guns, ammunition and food to support the campaign. New technologies were introduced including ironclad ships, balloons and telegraphy connecting units on the battlefield. The battle was costly, saw the rise of one great general and the fall of another and changed the course of history.
